

Solar power or other innovative usage

BML MUNJAL
UNIVERSITY™

- **Solar Cells**-Grid connected photovoltaic power system of 246 KW capacity.
- **LED Lights**-Whole the campus area is equipped with LED lighting for less energy consumption.
- **Natural Light Usage**-The design of academic & library building allows more day light usage decreasing energy consumption.
- **Air Cooled Chiller with adiabatic technology**- 650TR of air cooled chiller instead of water with inverter technology which save water & electricity.
